DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 4/30/2009 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 4/30/2009 was filed after the mailing date of the notice of allowance on 1/30/2009. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hao Tung on 1/8/2009.

The application has been amended as follows:

In claim 2, line 1, deleted "charge-transfer".

In claim 4, line 2, deleted "charge-transfer".

In claim 5, line 3, deleted "charge-transfer".

In claim 6, line 1, deleted "charge-transfer".

In claim 7, line 1, deleted "charge-transfer".

In claim 8, line 1, deleted "charge-transfer".

In claim 10, line 2, replaced "second and third charge-transfer materials" to
"second charge-transfer material and third material".

In claim 13, lines 1-2, replaced "first, second or third charge-transfer material"
with "first charge-transfer material, second charge transfer material or third material".

In claim 22, lines 1-2, replaced "second and third charge-transfer materials" to
"second charge-transfer material and third material".

In claim 23, lines 1-2, replaced "second or third charge-transfer materials" to
"second charge-transfer material or third material".

In claim 24, lines 1-2, replaced "second and third charge-transfer materials" to
"second charge-transfer material and third material".

In claim 25, lines 1-2, replaced "second or third charge-transfer materials" to
"second charge-transfer material or third material".

In claim 27, line 1, deleted "charge-transfer".

In claim 30, lines 1-2, replaced "second and third charge-transfer materials" to
"second charge-transfer material and third material".

In claim 31, lines 1-2, replaced "second and third charge-transfer materials" to "second charge-transfer material and third material".

Allowable Subject Matter

2. Claims 1-45 are allowed.
3. The following is an examiner's statement of reasons for allowance: the invention as claimed is not shown in the prior art especially with regard to a photovoltaic device comprising a nanostructured template made from a first charge transfer material having regular template elements between 1 nm and about 500 nm in diameter with a structure density of between about 10^{12} elements/m² and about 10^{16} elements/m² and a second charge transfer material conformally coating one or more walls of the template elements leaving additional space and a third charge transfer material filling the additional space wherein the third charge transfer material volumetrically interdigitates with the second charge transfer material. Thus Applicant's invention is considered novel.

The closest prior art is Den (EP 1087446) which discloses n-type crystalline aggregates within a porous alumina material. Applicant argues that such growths cannot be deemed a template because they are not self supporting. The Examiner agrees. Applicant argues that should the crystals of Den be considered a template there is no teaching of a second charge transfer layer conformally coating the template. The Examiner agrees, the second material layer in Den does not coat the walls of the crystals.

Moreover, templates are conventionally used in the prior art as a guide for producing the metal contacts. Such techniques would not have been obvious to one of

ordinary skill in the art at the time of the invention to be used to modify Den to create templates from the n-type charge transfer crystal aggregates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
